- Backer Angle for a complete finish

Baked Enamel Colours

Colours as shown are intended to be general guides. Printed colours are not an exact match for painted aluminum. Special designer colours are also available.

How to measure your Storm Door

Widths are ordered to the even inch between 30" and 36".

Actual Storm Door Width will be 1/4" less than as ordered.

Overlap flange covers 1/2" each side.

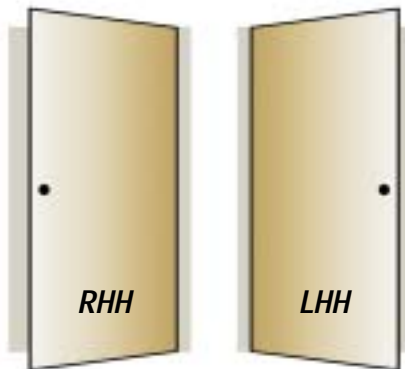

Heights are ordered as required to fit the opening between 78" min. and 86" max.

Example 1: W1=31 7/8", W2=31 5/8", H3=81 1/4"

Use the smaller W2 value of 31 5/8". A 32" door is actually 31 3/4" and is too wide for a W2 of 31 5/8". Order 31" width. Order the height as measured.

Example 2: W1=32 7/8", W2=33 1/8", H3=82 3/4"

Use the smaller W1 value of 32 7/8". A 33" is actually 32 3/4" and will fit. Order 33" width. Order the height as measured.

Aluminum Storm Doors

Storm Door Options

Tri-Lite

Tri-Lite Storm Doors combine an easy-to-use center venting window, a 10" kick plate with built in side-lites to add a decorator touch to your home!*

Hi-View

High-View Storm Doors offer a full width venting window, combined with a low-profile 8" kick plate, to show off more of your entry door system!*

Self Storing

Self-Storing Storm Doors allow for easy venting and contain a sturdy full height 20" kick plate. They're ideal for homes with children and pets!*

One-Lite

One-Lite Storm Doors offer excellent weather resistance without sacrificing the view of your entry door system! Switch between a full tempered glass lite and a full screen over a 10" kick plate!*

** Kick plate height listed for standard 80" door*
